

JVA Keypad

JVA Keypad

The Z Range JVA Keypad is manufactured specifically for the JVA Z Range. JVA has simplified things by designing one Keypad to operate the full range of Z Energisers from a simple home Z13 system to a high profile multi-zone system. The Keypad with its backlit LCD display gives the user, at a glance, all the information that may be required. The Keypad displays out and return voltages and can be fully customised with custom messages and names for Zones and Gates – front gate/back fence, etc.

Features:

- One Keypad operates the full Z Range
- Backlit LCD Display
- 1 to 14 Energisers can be controlled from one keypad
- 1 to 4 Keypads can be used to control one Energiser*
- Zone Voltage Displayed on the keypad
- Zone Voltage Scrolling function display for Multi-Zone systems
- Ability to customise zone and gate names
- PC Interface
- Simple 3-wire operation
- Maximum 100m on conventional communication cable
- Battery test voltage display

* Software version 7.10 and above only
